COLLABS

Inaugural Launch Session Summary

27 June 2026 · Saturday

INTERNAL — CORE TEAM ONLY

Session Details

Date	Saturday, 27 June 2026 · 9:05 PM – 10:50 PM
Format	Hybrid (Online + Physical Meeting)
Attendees	27 members — Founder, Director, Collaboration Directors, Field Managers, Subject Leads, Club Leads, Coordinators, Ambassadors, Media & Content team
Hosted by	Ehan Ali & Amna Sahar
Prepared by	Collabs · Post-Session Summary

Meeting Objectives

The inaugural launch session aimed to:

- Officially activate the Collabs Core Team.
- Introduce the vision and long-term direction of the platform.
- Provide members with an opportunity to review their roles and responsibilities.
- Gather initial feedback from representatives
- Discuss early priorities before public launch

1. SESSION OVERVIEW

The inaugural launch session of Collabs convened on the evening of Saturday, 27 June 2026, running from 9:05 PM to 10:50 PM. It brought together the full core team for the first time in a structured virtual plus physical setting, marking the transition of Collabs from a vision and structural framework into an active, operational community with every appointed role represented on the call.

The meeting was facilitated by Ehan Ali and Amna and structured across three primary phases: the founder's address, an open member review and a closing

discussion on execution priorities. The tone throughout was candid and collaborative, consistent with the internal, team-facing nature of the session.

2. FOUNDER'S ADDRESS

The session formally opened with an address from Syed Farhan Danish, Founder of Collabs. Farhan outlined the core vision driving the platform; to build a student-led digital community that bridges geographical and socioeconomic gaps between School students across Pakistan, with an initial focus on Chitral & Gilgit Baltistan.

He spoke to the inspiration behind Collabs: the recognition that access to academic support, co-curricular opportunity and peer connection should not be determined by which campus a student attends or where they are located. The platform, as Farhan described it, is a direct response to that disparity and a deliberate attempt to build something durable rather than temporary.

Farhan also contextualized the current stage of the platform: the structural groundwork is laid, roles are assigned and the team gathered on the call represents the first full activation of that structure. He emphasized that the real measure of the launch would not be the session itself, but what the team does in the weeks immediately following it.

3. OPEN MEMBER REVIEW

Following the founder's address, the session moved into its primary segment: an open member review in which representatives from across the team were invited to share their perspectives, questions and initial thoughts on their respective roles within the platform.

Members spoke in the following order of representation:

- Director
- Collaboration Director
- Field Leads
- Collaboration Ambassadors (Campus Ambassadors)
- Subject Specialists
- Social Media Managers

The review surfaced a consistent theme across contributions: enthusiasm for the platform's mission paired with a clear desire for structural clarity before execution begins. Members were broadly aligned on the value of what Collabs is building and most used their time to seek role-specific definition rather than raise fundamental concerns about direction.

Insights and observations raised during the review included the importance of clear communication channels between departments, questions around how Subject Leads and Club Leads would coordinate on overlapping initiatives and a shared interest in understanding what the first visible milestone for students would look like once the platform goes live.

4. PLANS & PROPOSALS DISCUSSED

The latter portion of the open review opened into a broader discussion of upcoming plans and initiatives. The most substantive proposal raised was the idea of hosting virtual events with a Model United Nations (MUN) cited as a flagship example of what Collabs could organize for its student community.

The proposal was met with unanimous agreement from the team. However, the consensus was clear and unambiguous on one condition:

> *All events, including the virtual MUN and any other co-curricular programs should be planned and executed only after a working operational framework is in place.*

This was not framed as a delay but as a sequencing decision: the team recognizes that launching events prematurely, before internal structures are functioning, would undermine both the quality of those events and the credibility of the platform. The framework comes first.

Key Decisions

The following decisions emerged from the discussion:

- Establishing an operational framework remains the immediate organizational priority.
- Public events will be planned only after internal systems become fully functional.

- Organizational structure should be strengthened before external expansion.
- The communication platform remains under consideration and will be finalized before the next meeting.

5. ITEMS NOT ADDRESSED

The following item was identified as a notable gap in the session. It was not raised or discussed and will need to be brought to the team in a subsequent meeting:

⚠ Website Launch Timeline

The timeline for the Collabs website going live was not addressed during this session. As the primary public-facing touch point for incoming students and campus stakeholders, this will be placed on the agenda for the next team meeting.

This should be placed on the agenda for the next team meeting.

6. PENDING DECISIONS

The leads have yet to reach a decision on the primary communication platform for the team. The two options under consideration are Google Chat and WhatsApp. This remains open and will need to be resolved before the next session.

7. CONCLUSION

The inaugural launch session of Collabs concluded successfully on the evening of Saturday, 27 June 2026. The session achieved its core objective: bringing the full 27-member core team together for the first time, establishing a shared understanding of the platform's vision and opening structured dialogue across all roles and departments.

The team demonstrated strong alignment on the platform's mission and a clear, collective commitment to execution. The consensus reached on event sequencing that all programming will follow the establishment of a working operational framework reflects the maturity and discipline of the team as it moves into its first active phase.

The items noted as pending, the website launch timeline and the communication platform decision, are to be resolved in the next team session. The foundation laid today positions Collabs to move into active operation with clarity, coordination and purpose.

(Note: Google Chats finalized after complete survey from the team)
